Professional Summary

AI Automation Engineer and Computer Science Lecturer with hands-on experience designing, building, and deploying production-grade agentic AI systems, real-time conversational voice agents, and full-stack automation pipelines. Proficient in building AI voice agents using Vapi, ElevenLabs, and Retell AI that collect and update user data in real time, remember past conversations, book appointments, and trigger webhooks across CRMs and business tools. Skilled in low-code orchestration platforms (n8n, GoHighLevel, Zapier), custom Chatwoot deployments, LLM integration (GPT-4, Claude, Gemini, Deepseek), Retrieval-Augmented Generation (RAG) architectures, and full website/service builds. Experienced in AI-driven content pipelines including automated, SEO- and LLM-crawlable blog generation and social media content automation. Combines strong technical delivery with academic teaching experience in Artificial Intelligence and Computer Science.

Key Skills

- **Agentic & Voice AI:** Vapi, ElevenLabs, Retell AI, Twilio, real-time conversational agents, appointment booking, webhook & CRM data sync
- **Low-Code Automation:** n8n, Make, Zapier, GoHighLevel (GHL), Chatwoot, Notion
- **AI/LLM Integration:** OpenAI GPT-4, Claude, Gemini, Deepseek, Grok, Retrieval-Augmented Generation (RAG), prompt engineering
- **Sales Intelligence & CRM:** Apollo, Apify, HubSpot, Pipedrive, Salesforce
- **Programming:** Python, Java, C/C++, JavaScript, TypeScript, SQL
- **Frameworks:** Ruby on Rails, Angular, React Native, Flask, Django, Node.js
- **AI/ML:** TensorFlow, PyTorch, OpenCV, Hugging Face, predictive modeling, model deployment
- **Databases & Tools:** MySQL, Firebase, Supabase, Git, Jupyter, Google Vertex AI
- **Data:** Redis, PostgreSQL matplotlib, seaborn, Power BI

Professional Experience

AI Engineer

Karachi, Pakistan

Kodexo Labs (Full-Time, Evening)

Sep 2025 – Present

- Build and deploy real-time AI voice agents (Vapi, ElevenLabs) that qualify leads, book/cancel/reschedule appointments, remember prior conversations, and sync data via webhooks – including dental booking agents and lead-qualification agents for enterprise level companies.
- Engineered the complete website, service platform, WhatsApp AI agent, and Vapi voice agent; built a custom Chatwoot deployment for companies.
- Developed real estate document-intelligence agents that extract lease data, calculate real-time lease terms, and notify admins via Slack/email, reducing manual document review.
- Built AI content automation: social media posts generated with Claude and auto-scheduled, and real-time-data blog pipelines that auto-publish articles fully crawlable by Googlebot and LLM/AI bots.
- Built GoHighLevel (GHL) automations for triggered email/SMS campaigns and webhook-based pipelines syncing caller/lead data into HubSpot and Pipedrive in real time.

Lecturer, Computer Science

Karachi, Pakistan

Bahria College Karsaz (Full-Time, Morning)

Feb 2026 – Present

- Deliver instruction in Computer Science covering programming fundamentals, artificial intelligence, and data structures; design course materials, assignments, and assessments.
- Mentor students on AI and automation concepts, bridging classroom theory with real-world industry practice.

AI Software Developer (Remote)

Karachi, Pakistan

Bahria Technologies

Apr 2024 – Aug 2025

- Built Angular-based dashboards serving 50+ users with real-time analytics.
- Automated backend workflows (API development, authentication, data processing) in Node.js and Python, reducing manual work by 80%.

AI Software Development Engineer (On-Site)

Karachi, Pakistan

Authentik Track and Trace

Jan 2024 – Dec 2025

- Developed and maintained Angular-based web dashboards and database management systems.
- Built and optimized frontend applications using Angular, ensuring seamless user experience and performance.
- Developed and managed automation scripts and backend services using Node.js and Python, handling API development, authentication, and data processing.

Selected Projects

AI Voice Agent Automation for Multi-Segment Customer Engagement

Oct 2025

- Designed an AI voice agent handling inbound/outbound conversations across B2C families, B2B advisors, shop inquiries, and customer support with strict segmented conversation flows.
- Integrated **GPT-4**, **ElevenLabs**, **Twilio**, and **n8n** for conversational intelligence, voice generation, call handling, and orchestration, with webhook-based data capture updating **HubSpot** automatically.

- Designed a 6-agent AI workflow in **n8n** generating structured 35-day course scripts using a **Retrieval-Augmented Generation** architecture with **Claude 3.5 Sonnet** and **Supabase Vector Store**.
- Automated the pipeline from topic selection and context retrieval to draft creation, validation, and final formatting, cutting manual research and writing effort significantly.

AI-Powered Fashion Design & Virtual Try-On App

2024

- Built an SDXL + IP-Adapter backend generating apparel designs and fitting them onto user photos with 95% accuracy, paired with a React Native app for browsing, design, and try-on.

Education**B.S. in Artificial Intelligence**

Karachi, Pakistan

Bahria University, Karachi Campus

2022 – Dec 2025

- CGPA: 3.2/4.0
- Relevant coursework: Machine Learning, Artificial Neural Networks, Computer Vision, Data Mining, Operating Systems, Data Structures & Algorithms, Reinforcement Learning

Awards & Certificates

- **2025** – Prize Winner, AI Agent Development Competition, jointly organized by BUAIC and Microsoft
- **2025** – Top 5, Agentic AI Development HackFest Hackathon, IBA
- **2024** – Top 10, GDG Kolachi AI Hackathon by Google
- **2026** – AI Engineer of the month at Kodexolabs
